Alexandros Rikos

CV - Web version

Electrical-engineering graduate driven by curiosity and with significant international experience. I am currently active as a cybersecurity engineer. My other interests include mathematical modeling, signal processing, and artificial intelligence.

Experience

- **Cybersecurity Engineer**
  Continental Engineering Services GmbH, Frankfurt am Main *Oct 2020 - Present*
  - My tasks include performing risk analyses, analyzing requirements, consulting customers and being responsible for the cybersecurity in automotive projects.

- **Research Intern**
  ICT Lab, TU Eindhoven, The Netherlands *Apr 2019 - Dec 2019*
  - The project was focused on SRAM Physical Unclonable Functions (PUFs). My work led to the development of an algorithm that models the temperature behaviour of the SRAM PUF and then uses this information to improve reliability.

- **Deep-Learning Intern**
  Philips Research Eindhoven, The Netherlands *Nov 2018 - Mar 2019*
  - In this internship I investigated the potential of adversarial neural networks in sleep monitoring. My work demonstrated how adversarial architectures can be used to increase performance in sleep-stage classification.

- **Student Assistant**
  TU Eindhoven, The Netherlands *Sep 2015 - Nov 2018*
  - As a student I had multiple side jobs such as: calculus tutor, lab assistant, preparation of exam training sessions and being a project leader for team of bachelor students.

- **Research Intern**
  VCA Group, TU Eindhoven, The Netherlands *Sep 2016 - Jan 2017*
  - The project was focused on Computer-Aided Detection (CAD) of esophageal cancer. I used machine learning techniques and showed that the prediction performance can be increased by combining information from multiple scans.

Education

- **MSc Electrical Engineering (with distinction)**
  TU Eindhoven, The Netherlands *Sep 2017 - Dec 2019*
  - Master thesis: Using temperature information in SRAM-PUF helper data to improve performance of a key-binding scheme (9.0/10.0)

- **BSc Electrical Engineering**
  TU Eindhoven, The Netherlands *Sep 2013 - Apr 2017*
  - Bachelor thesis: Improved Barrett's cancer detection in volumetric laser endomicroscopy scans using multiple-frame voting (8.5/10.0)

- **Apolytirion**
  4th General Lyceum of Corfu, Greece *Sep 2010 - Jun 2013*
  - Specialization courses: Mathematics, Statistics, Physics, Chemistry, Biology, Modern Greek

Additional Courses

- "Tensorflow in Practice", a four-course specialization by deeplearning.ai on Coursera (Nov 2018)
- "Databases and SQL for Data Science", a course by IBM on Coursera (Jun 2020)
- "Deep Learning", a five-course specialization by deeplearning.ai on Coursera (Nov 2018)
- "Machine Learning", a course by Stanford University on Coursera (Mar 2017)

Relevant Skills & Languages

- Signal Processing, Data Analysis, Modeling, Machine Learning, Electronics
- Python, Matlab
- LaTeX, Multisim, Git, Microcrontrollers

Greek (native)	●●●●●
Dutch (native)	●●●●●
English (C2)	●●●●●
German (C1)	●●●●○
Spanish (B2)	●●●○○

Publications

Other activities

- Organized numerous language events for the international student association of TU Eindhoven. This was done to connect students from different cultures. My responsibilities included the entire organizational process, from securing a suitable venue to ensuring that everything ran smoothly on the day of the event.
- In my free time, I enjoy playing tennis and learning languages. I am a big fan of traveling.
